## CONTENTS

### Volume 43, Number 1, 1994

**A. I. Loginov and V. S. Shul'man,** Vector-valued duality for modules over Banach algebras ..... 1

**A. V. Romanov,** Sharp estimates of the dimension of inertial manifolds for nonlinear parabolic equations ..... 31

**Z. Kh. Rakhmonov,** Theorem on the mean value of $\psi(x, \chi)$, and its applications ..... 49

**Ivan B. Fesenko,** Local class field theory: Perfect residue field case ..... 65

**V. A. Shlyk,** Normal domains and removable singularities ..... 83

**V. A. Klyachin,** Maximal tubular surfaces of arbitrary codimension in Minkowski space ..... 105

**V. A. Babets,** Pseudoforms with negative curvature on $\mathbf{CP}_n$. II ..... 119

**A. E. Polishchuk,** I. N. Bernshtein-I. M. Gel'fand-S. I. Gel'fand equivalence for triangulated categories generated by helixes ..... 127

**V. A. Krasnov,** Algebraic cycles on a real algebraic GM-manifold and their applications ..... 141

**D. V. Tunitskiĭ,** The Cauchy problem for hyperbolic Monge-Ampère equations ..... 161

**S. G. Tankeev,** Abelian varieties and the general Hodge conjecture ..... 179

### Volume 43, Number 2, 1994

**A. A. Karatsuba,** On the zeros of arithmetic Dirichlet series without Euler product ..... 193

**O. O. Barabanov and V. V. Zhikov,** The limit load and homogenization . 205

**R. R. Gadyl'shin,** Splitting of the poles of a Helmholtz resonator ..... 233

**M. G. Grigoryan,** On some properties of orthogonal systems ..... 261

**M. Z. Shapiro,** Topology of the space of nondegenerate curves ..... 291

**Kh. P. Rustamov,** On approximation of functions on the sphere ..... 311

**I. A. Kuzin,** Comparison theorems for variational problems and their application to elliptic equations in $\mathbf{R}^N$ ..... 331

**O. V. Odinokov,** Differential operators of infinite order in some spaces of entire functions ..... 347

**M. R. Èntov,** On the real preimages of a real point under the Lyashko-Looijenga covering for simple singularities ..... 363

**P. I. Naumkin,** Large-time asymptotics of solutions of the nonlinear Schrödinger equation in $2+1$ dimensions ..... 373
**V. A. Krasnov,** On cohomology classes defined by the real points of a real algebraic GM-surface ..... 385

## Volume 43, Number 3, 1994

**D. P. Zhelobenko,** The algebra of quantum bosons, the Schubert filtration, and Lusztig bases ..... 397
**E. I. Zelenov,** The infinite-dimensional $p$-adic symplectic group ..... 421
**P. I. Naumkin and I. A. Shishmarëv,** Asymptotics, as $t \to \infty$, of the solution of a nonlinear equation with weak dissipation and dispersion ..... 443
**V. S. Pron'kin,** On quasiperiodic solutions of the matrix Riccati equation 455
**A. V. Rozhkov,** Centralizers of elements in a group of tree automorphisms 471
**T. L. Troshina,** The degree of the top Segre class of the standard vector bundle on the Hilbert scheme $\mathrm{Hilb}^4 S$ of an algebraic surface $S$ ... 493
**A. F. Filippov,** Classification of compact invariant sets of dynamical systems ..... 517
**V. V. Shokurov,** An addendum to the paper "3-fold log flips" ..... 527
**V. V. Shtepin,** Intermediate Lie algebras and their finite-dimensional representations ..... 559
**Sh. A. Ayupov and N. Zh. Yadgorov,** Geometry of the state space of modular Jordan algebras ..... 581
**A. S. Belov,** On an extremal problem on the minimum of a trigonometric polynomial ..... 593
**Yu. S. Kolesov,** A special relaxation cycle of a system of differential-difference equations ..... 607
